

Christmas Bauble Design Instructions

The manufacturer will use three 40mm x 40mm squares to print the design onto the bauble's surface. The bauble can accommodate three images of 40 x 40mm. These images can either be identical or different, depending on artist preference. When submitting your design, please make sure it is clear if you are including one design to be repeated around the bauble, or three images which complement each other.

One (or all) of these image squares should either be or include the word 'York', or some variation around a Christmas greeting (e.g., 'Merry Christmas from York').

Artists should produce a design using the guidelines provided and give a short explanation of their design. The design(s) must fit inside a square of this size – we can accept artwork which is larger than the finished size but be aware that it will be made smaller in order to fit into the print area of the bauble and some detail might be lost.

The bauble is made of white porcelain and the background to your design(s) should be white.

Here is an example of a bespoke bauble, so you can see how a finished one might look: <https://stbarnabashospice.co.uk/product/lincoln-imp-trail-bauble/>

You can use this square as a guide for the size of the printed image:
